

Ergo Line Combo

Neutral + Fan heating

Product description

Ergo Line Combo is made to hold and transport cold and hot food in two separate compartments. The box is designed with ScanBox ExP construction that combines optimized insulation performance with high operational reliability and environmentally conscious choices.

The lower compartment of the box is neutral and can hold both hot and cold food. Storage can be extended by the easy retrofitting of runners for eutectic plate. The upper compartment of the box has a static heating system that provides stable heating by natural convection and can reach operating temperatures of up to 90°C. Adjustable

temperature and ventilation ensure excellent food quality control. ScanBox Ergo Line Combo is available in several sizes and variants with a capacity of up to 12 containers in the GN 1/1 standard.

Equipped with ScanBox Digital Control, excenter lock, solid doors, 160 mm lockable wheels, removable U-guide rails with 80 mm spacing, black RAL 9005, 220-230V single phase as standard. The equipment can be easily adapted as required through available extra options.
